

Project Factsheet for: Sangamon River Watershed, Illinois (Lake Decatur, Illinois)

Date Last Updated: 02/09/2007 10:35

Project Location Information

Location: Sangamon River Watershed upstream of Lake Decatur, Illinois
River Basin(s): Illinois
State(s): IL
Congressional District(s): IL-19, IL-3

Status

Authorized, but not funded. Potential Congressional Add.

Description

The Sangamon River watershed is located in central Illinois and is a major tributary to the Illinois Waterway, which passes through Lake Decatur. Lake Decatur, the water supply source for the city of Decatur, is experiencing water quality problems and ecosystem degradation. Sedimentation and high nitrate levels are affecting the water quality. This study would focus on the restoration of water quality and methods to control and remediate nutrient enriched sediments in the portion of the Sangamon River, which feeds into Lake Decatur.

Summarized Financial Data

Federal Cost	\$665,000
Non-Federal Cost	\$565,000
Total Cost	\$1,230,000
Federal Allocations through FY 2006	\$0
Balance to Complete	\$665,000

Major Work Item (This Fiscal Year)

FY 2007: None

Major Work Item (Next Fiscal Year)

FY 2008: If funds were appropriated, \$100,000 could be used to complete the Reconnaissance Report.

Authority

GI - General Investigations -- This study is authorized by Section 503 of the Water Resources Development Act 1996, PL 104-303, as amended by Section 552 of the Water Resources Development Act of 2000.
